

How Will You Ensure Project Success?

Let VMC Show You The Way.

Project Management Assessment Process

When you are managing concurrent projects for your company or your customers, it can be a challenge just to keep the projects in motion. That may be good or may be not so good, but you really don't have the time and resources to evaluate and adjust your projects midstream. As consultants who manage projects, ourselves, we understand.

At VMC, we developed a Project Management Assessment as an unbiased evaluation of your project status, with recommendations for helping you optimize performance and complete your project on time and on budget. We uncover strengths and weaknesses in projects, programs and portfolios, or even across the enterprise. Our Assessment can help you determine project management health as an organization, following PMI and CMMI best practices, improving efficiency, and tracking to time, budget and scope.

Led by Senior Project Management Consultants, our Project Management Assessment follows a defined process for evaluation and recommendations.

Phase One - Evaluation

INTRODUCTION MEETING

- Charter
- Stakeholder Analysis
- Schedule

KICK OFF WORKSHOP

- Scope
- Detailed Process
- Detailed Schedule
